

Permission to Send Mass Email

(please **print names** except for signature at end)

I, _____, parent/guardian of _____, understand and agree to the following.

I acknowledge that on the application form to MathPath we gave MathPath (hereafter “you”) one or more email addresses in order to reach me, my spouse (if any) and my child named above. In addition to personal emails to us about our individual application, you have good reason to send mass emails before and during camp to many or all of the email addresses you have obtained in this way. In addition, after business for this year’s camp is completed, you intend to send occasional emails to alumni families, which you deem of possible interest to them and to encourage continued involvement with MathPath, including encouragement to participate in your yearly fundraising campaign.

I agree to this use to our email addresses in mass mailings, with the following conditions:

- 1) Our addresses will always be on a bcc (i.e., hidden) list unless we have agreed to share our addresses with all recipients of the mailing (but see 4).
- 2) You will not give our email addresses to third parties unless we've already agreed to it.
- 3) All mass mailings sent to us on alumni business will include the option to opt off of our mass mailing list.
- 4) item 1) notwithstanding, we understand that mistakes do happen and email programs often require extra steps to use a list as bcc. If by accident MathPath fails to send a mass mailing using bcc, I promise to help by deleting the email, with its visible list of recipients, as soon as I have read it.

Finally, I understand that the most common times for MathPath to share email addresses with a group of families is when you are sharing contact information among MathPath admits from the same area, and for the yearbook produced at the end of each year’s camp, in which each student and staff has a page on which they can put their email address and various social media tags. For the former, I agree to the default that no answer in 2 days (when asked as part of the admission email) means I agree to share; and for the latter, I understand that the yearbook is not made public by MathPath, but you cannot control how MathPath families guard their copies, and that you remind the students to ask their parents what contact information they may share, but you cannot guarantee that they did so.
